

## FF SAF801

# Smart Artificial Intelligence Fire Detection

Utilizing the current CCTV system imagery, the AI system facilitates early flame detection, allowing for prompt identification of fire outbreaks and immediate notification to relevant personnel and locations.

### FEATURES

- ▶ Provides real-time fire detection and mobile notification.
- ▶ Minimum response time for notifying the fire department.
- ▶ User-friendly interface for easy operation.
- ▶ Seamlessly integrates with existing camera systems.
- ▶ Since it sends an alarm with a photo, you can be sure where the fire is and provide a more effective response.
